

Index.HTML

HTML Validator / Linter

Validates HTML files for compliance against the W3C standards and performs linting to assess code quality against best practices.

Find missing or unbalanced HTML tags in your documents, stray characters, duplicate IDs, missing or invalid attributes and other recommendations.

Supports HTML5, SVG 1.1, MathML 3.0, ITS 2.0, RDFa Lite 1.1. Implementation is based on [Validator.Nu](#).

Option 1: Copy-paste your HTML document here

Option 2: Or upload your HTML file

VALIDATE HTML

The document is valid and conforms to best practices and standards. Good job!
